Anna University, Chennai

Anna University was established on 4th September 1978 as a unitary type of University. It offers higher education in engineering, technology and allied sciences relevant to the current and projected needs of the society.

Madras Institute of Technology (MIT)

MIT campus of Anna University offers higher education with the objective of devising and implementing programs of education in engineering & technology, constituting a blend of the conventional and unconventional career courses in UG, PG & Ph.D levels that are relevant to the current and projected need of society.

Dr. Kalam Computing Centre

Computer Centre is a technology provider to students, researchers and teaching community to fulfill their computational, technological and internet requirements of the campus. The Computer Centre was established in 1983 at Madras Institute of technology. It also provides the computing facility for the academicians and administrative staff of the university and serves directly by the way of giving internet ready systems, internet access to MIT through the campus wide computer network & Wi-Fi connectivity. It is exclusively used for academic activities like video conferencing, satellite education and data processing activities. The Website is being maintained by the web team where the students are part of it which helps them to develop and enrich their knowledge.

Objective and Description

This program will provide an opportunity to the participants to get knowledge about the C Programming Language.

The objective of this programme is to facilitate the students to improve creative thinking, computational thinking, computer usage & Programming skills, etc.

Speakers

Experts from relevant field.

Registration Fee : ₹1500/-

Total number of participants will be restricted to 50 numbers. Participants will be selected on First Come First Served Basis.

The Participants are requested to send the scanned copy of filled in registration form to **trainingca2023@mitindia.edu**

Topics to be covered:

In this course students will learn about:
- An overview of computer System
- Introduction to Software
- Programming basics and fundamentals of C
- Data types in C
- Mathematical and logical operations
- Using if statement and loops
- Arranging data in arrays
- Implementing pointers
- File management and dynamic memory allocation
